KEY-LUBE

Multi-Purpose Pharma Lubricant

ABOUT KEY-LUBE®

KEY-LUBE is a general-purpose lubricant available for use on most pharmaceutical, food, beverage and personal care equipment applications. It can be used anywhere standard greases and oils are used.

KEY-LUBE is an FDA approved, heavy duty, smooth grease fortified with "Teflon"®. The "Teflon" particles act as an anti-friction "ball bearing." KEY-LUBE has excellent adhering qualities – it stays where you put it! It is heat stable up to 300°F, can withstand high pressure and is resistant to water wash down.

APPLICATIONS

- All bearing and sliding surfaces that require nearly colorless or white grease
- All pharmaceutical processing equipment applications
- All bearings and sliding surfaces on food handling equipment

LOOK TO KEY INTERNATIONAL FOR:
