HT-300/500 and 300S/500S Quick Start Guide

Listed below please find the basic operational procedure for the Key Tablet Hardness Tester:

1.)   Apply power and turn unit on via Power Switch. Printer will print a row of zeroes.

2.)   Press the X,O button to turn on the Statistics function. LED will illuminate.

3.)   Set the Continuous restart value using the CONT button, if desired.

4.)   Place the first sample on the pedestal, then close isolation cover.

5.)   Press START. Motor will initiate test cycle.

6.)   When the sample breaks, a result will be printed. Brush off tablet pieces.

7.)   Place next sample onto pedestal and wait for Automatic Restart or press START.

8.)   Continue following procedure from step 6, until all samples have been tested.

9.)   Press STOP to end testing.

10.)   Press X,O to print out statistical report.
